September 1-4, 2010

Vienna, Austria

Congress Venue:

Allgemeines Krankenhaus der Stadt Wien

(Vienna General Hospital)

- Hörsaalzentrum -

Währinger Gürtel 18-20, 19. Bezirk

Dear friends and colleagues,

Vienna has the pleasure to host the 8th Congress of the European Laryngological Society from September 1 to 4, 2010.

Laryngology deals with a wide variety of health disorders, particularly with inflammatory and neoplastic disease, with disorders of voice, breathing and deglutition, and with neurological disorders affecting the larynx.

It was our aim to bring together laryngologists from all parts of Europe and beyond, dealing with all of the different aspects of laryngeal disease, and to gather for a fruitful clinical and scientific exchange.

From the program, it is obvious that the main focus of our meeting is on neurolaryngology, oncology, and phonosurgery. However, other relevant topics, including presbylaryngology, laryngeal angioedema, and the impact of modern technologies on the practice of Laryngology will also be covered. We have chosen to include more round tables into the program to stimulate a lively discussion.

In the past, many important innovations in the field of laryngology were first performed and described in Vienna. Therefore, the city of Vienna has a long and important relation with laryngology, and certainly ranks among the top European capitals related to Laryngology. On Saturday morning, a guided tour will take all those interested in the history of Laryngology to some of the important sites in Vienna.

Nowadays, Vienna is a modern cosmopolitan city at the junction between the western and the eastern parts of Europe, with a rich cultural and historical tradition. Vienna General Hospital, serving as the academic hospital for Vienna Medical University, is among the largest and most important academic hospitals in Europe. It will host our congress.

We look forward to welcome you all in Vienna and we hope to succeed in making this congress a successful and stimulating event, both scientifically and socially.

We are most thankful to Prof. Wolfgang Gstöttner, Professor and chair, Oto-Rhino-Laryngological Clinics, to officials at Vienna General Hospital, Vienna Medical University, to Prof. Marc Remacle - spiritus rector of ELS and personal friend -, to the members of the Presidential and the Scientific Council of ELS (particularly to Prof. Fred Dikkers, General Secretary, and Prof. Christian Sittel, Treasurer), to Prof. H. Swoboda for continuing stimulation, to the staff at CONGRESOS (notably to Ms Sara González), to Mag. Maria and Ms Kerstin Hamata at MAW, to the corporate members of ELS, to our sponsors and exhibitors and to our co-workers and secretaries, who all helped to advance this program.

Welcome to Vienna!
