

Dissections

Dissection Chairs:

E. Tamm
T. Reichert
R. Magritz

Anatomic dissections (October 10)

This 7 hour workshop is instructed by multiple faculty. Two participants share one fresh frozen cadaveric head. After pro-dissection, the participants perform a face lift, an endoscopic brow lift and an endoscopic midface lift. Subsequently, the participants can take their specimen to the sliding genioplasty work station, where they are instructed in these osteotomies. The subsequent free dissection time may be utilized according to the participant's preferences and may include blepharoplasty, rhinoplasty or reconstructive maneuvers.

Workshop auricular reconstruction (October 10)

The carving of an auricular framework will be taught by one of Europe leading experts, Ralph Magritz. An established synthetic model will be utilized to practice the fabrication of the framework step by step.

The Regensburg Course in Facial Plastic Surgery, October 7th - 10th, 2012

Welcome

Dear Colleagues and Friends:

After the wonderful success of the past Regensburg courses, we would like to invite you for more outstanding surgical training in a spectacular environment. We have incorporated your feed back in an effort to further improve the scientific program for **“The Regensburg Course in Facial Plastic Surgery”**, which will take place from **October 7 – 10, 2012**.

The course program is specifically designed to teach facial plastic surgery techniques in a structured, step-wise manner. Outstanding faculty from Europe and the USA will train you in:

- Modern techniques in facial rejuvenation:
Face lift, Endoscopic brow lift, Blepharoplasty, Fat Grafting.
- Advanced concepts in rhinoplasty and otoplasty:
Minimal invasive, incisionless and revisional techniques.
- The latest advances in fillers, chemodenevating agents and resurfacing.

The lecture series (Oct 7-9) features presentations, surgical videos and live transmission of procedures direct from the operating room. A **full day of dissections on fresh frozen anatomic specimen** and the **workshop auricular reconstruction** are offered on Oct 10.

Early registration is recommended.

The course is organized in collaboration with Mayo Clinic. The program chairs have taken special care to ensure clear and concise presentation and didactics so that participants who are not fluent in English will easily be able to follow the program. CME credits (EACCME, BLÄK, convert to US CME) are available. For registration please visit

Regensburg, is one of Germany´s most wonderful medieval towns, relaxing yet vibrant. The town is located close to Munich (visit the famous Oktoberfest at the same time). Travel is easy to Munich airport, and hotel accommodation is affordable. Please let us welcome you to the “The Regensburg Course in Facial Plastic Surgery 2012” and to the charming beauty of our city, a UNESCO world cultural heritage.
